CAREER OBJECTIVE

To obtain a challenging position in Data Analytics where I can leverage my analytical thinking, technical expertise, and problem-solving abilities to extract actionable insights, support data-driven decisions, and contribute to organizational growth through innovative data solutions.

EDUCATION

Lahore Garrison University
2022-2026

Bachelor of Science in Information Technology

TECHNICAL EXPERIENCE

- Developed web applications using C++ and HTML, including an online voting system and other front-end projects.
- Managed and configured networking systems, implementing Active Directory, DNS, DHCP, and user access policies in a virtualized environment.
- Performed SQL database management and query optimization for data handling and analysis.
- Configured IP addressing and subnetting within computer networks for efficient connectivity and security.
- Applied Agile methodologies in IT project management to ensure timely and successful project delivery.
- Identified and supported key software engineering roles and processes within development teams.
- Utilized various information systems including CRM, ERP, DBS, and TMS to support business operations.
- Demonstrated entrepreneurship and leadership by initiating and managing a co-work space project.
